

Activity #3: Smart Art

A Brain Module Activity: **How Does Your Brain Tell Differences in Color Shades?**

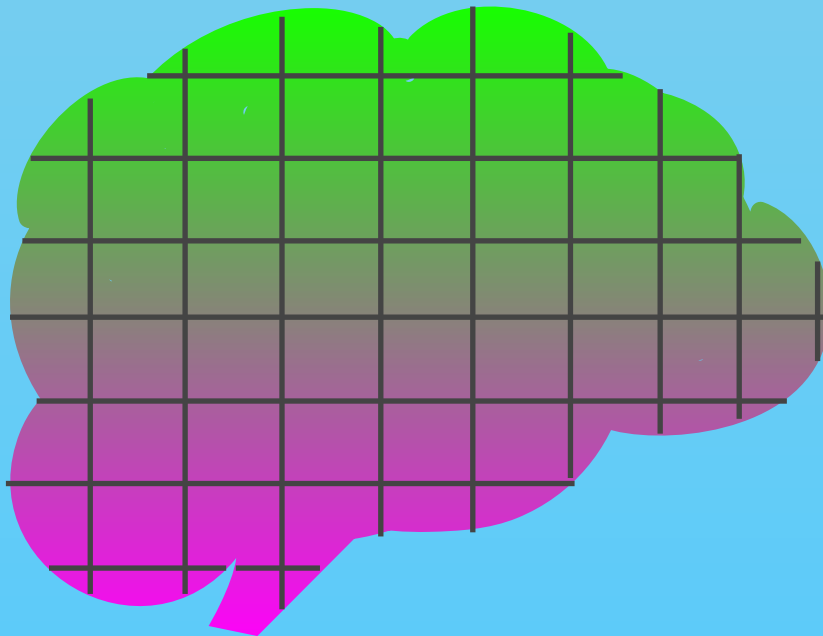

Description

Test your eyesight in this confusing team puzzle. The only hints provided in this task will be the pieces that mark the outline of the brain as well as the colors within the pieces. Unlike a jigsaw puzzle, these pieces will be square making the puzzle even harder. Try to finish the puzzle before time is up.

1

Designate Parts

Who is better at detecting differences in shades of green? How about pink? How about the shades in between? Our advice is to split up your team to designate pieces that each person must assemble. If you are individual, we recommend you first assemble the pieces that outline the brain.

2

Finish the Puzzle Quickly

The hardest part of this game is being able to distinguish the shades of colors. Test how good your eyes are by placing the correctly colored puzzle pieces in the right spots. Make sure that you don't run out of time.
